

Arduino Live Class

Description:

This course was created to help students comprehend what they're doing. You can start from the beginning, gain the essential foundation, and learn the entire process of creating Arduino projects through practice and hands-on training.

Start Date:

Doubt Clear Time:

Course Time:

Features:

- # Online live classes
- # Doubt Clearing
- # Live-Class Recording
- # Real-time Project
- # Assignment in all modules

- # Quiz in every module
- # Career Counselling
- # Completion Certificate

What we learn:

- # Arduino UNO
- # Arduino Mega (R3)
- # Arduino Mega
- # Arduino Leonardo
- # Arduino Due
- # Arduino Zero

Requirements:

- # A multimeter
- # A breadboard
- # Wires
- # An Arduino UNO board
- # Your dedication

Instructor:

Name:

Kishan Menaria

Description:

Having 2+ years of DataScience and AI in Hardware Edge Devices, proficient in data modelling, data preprocessing as well as scripting language Python Programming Language have experience with Robot Operating System (ROS) Have

Experience in AI in Edge Devices. Machine Learning and Deep Learning (Computer Vision) are two of my areas of expertise. I love the R&D work and making Businesses models and strategies or Developing technical solutions for business problems.

>Introduction to the course:

>>Course Overview and Roadmap Ahead

>>Hardware parts and tools requirement

>Overview of Ardiuno Family:

>>Arduino UNO

>>Arduino Mega (R3)

>>Arduino Mega

>>Arduino Leonardo

>>Arduino Due

>>Arduino Zero

>>Arduino 101

>>Arduino Pro Mini

>Installation and Setup IDEs:

>>Arduino IDE installation

>>Arduino IDE setup

>>Understanding the Preferences pane and Menu items

>>Connect your Arduino board and Find it on the Arduino IDE

>>Using simulator: Tinkercad

>Detail Explanation of Arduino

Boards:

>>Atmega328P

>>USB

>>Shields

>>Power

>>Clock

>>Digital output pins

>>Digital input pins

>>Analogue output pins

>>Analogue input pins

>Prototyping in Arduino:

>>Understand and configure breadboard Using the breadboard.

>>Powering your Arduino with power supplies

>>Using the multimeter to measure voltage

>>Using the multimeter to measure current

>>The multimeter - Resistance and continuity

>>Introduction to soldering - the soldering iron

>>Soldering - preparation and using holders

>>Soldering - using wire cutters and fume extractor

- >>Soldering - Simple maintenance tips for your solder iron
- >>A demonstration of soldering a header onto a breakout board
- >>Introduction to protoboards
- >>Reading a Schematic
- >>Applying Ohm's Law

>Practice with Arduino pins:

- >>Digital pins as output pins
- >>Digital pins as input pins
- >>Analogue pin
- >>Serial communication(send data to receive data)
- >>Time functionality management

>Arduino Programming:

- >>Syntax, Program Flow, and Comments
- >>Datatypes
- >>Variables
- >>Variable scope
- >>Arithmetic Operators
- >>Predefine functions
- >>Custom functions
- >>Creating custom functions and the return keyword
- >>Constants
- >>Introduction to control structures:

>>The "if" statement

>>The "while" statement

>>The "For" statement

>>The "Switch" statement

>>while loop

>>for loop

**>Ardunio advance
programming:**

>>Arrays

>>Strings

**>Connect LCD display with
ardunio:**

>>Introduction to LCD

>>Add the LCD Screen to Your Circuit

>>LCD wiring in 4-bit parallel mode

>>LCD demonstration sketch

>>Display sensor data in the LCD

>>Connect LCD using the I2C adaptor

>>Using the RGB LCD and buttons shield

**>Serial Communication in
Ardunio:**

>>Send data

>>Receive data

>Sensors with Arduino(s):

>>Temperature sensor

>>Humidity sensor

>>Pressure sensor

>>Infrared motion sensor

>>Distance sensor(Ultrasonic sensor)

>>Sounds sensor

>>Detecting acceleration

>Wireless connectivity:

>>Bluetooth

>>Wi-Fi

>>Cloud

>>Using GPS with Arduino

>Robotics with Ardunio:

>>Introduction: Robots

>>Transistors as Switches

>>DC Motor

>>H-Bridge

>>Servo Motor

>IOT with Ardunio:

>>Introduction: The Internet

>>CART

>>Connecting to WiFi

>>GET a Web Page

>>JSON Primer

>>Introduction: What is IoT?

>>Posting to ThingSpeak

>>Intro to IFTTT

>>Making Requests to IFTTT

>>Passing Arguments to IFTTT

>>IFTTT to ThingSpeak

>Major project:

>>Bomb decoder game

>>Serial LCD screen

>>Ultrasonic people counter

>>OLED breath analyser

>>Ultrasonic soker

>>Fingerprint scanner

>>Ultrasonic robot

>>Internet controlled LED

>>Voice-controlled LED

>>GPS speedometer

>>Obstacle detection

>Project categories:

>>Light Project

>>Sensor project

>>Sounds project

>>Power project

>>Security

>>Smart machine

>>USB project with Leonardo

>>Miscellaneous project

>Project Idea:

>>Modem-based security system for restricted area

>>Campus fire monitoring systems

>>Light intensity control system

>>Dc motor control system

>>Temperature monitoring control system

>>Home autonomous system

>>Fingerprint-based autonomous system

>>Wireless irrigation system for agriculture field
